

## **Sustainable Development Consultation Gaspésie-Magdalen Islands**

Project « Together for a sustainable future »

CREGÎM (Conseil régional de l'environnement de la Gaspésie-Îles-de-la-Madeleine)

In collaboration with

Gaspesian CEDEC (Community Economic Development and Employability Committee)

and

CASA (Committee for Anglophone Social Action)

The following topics will be addressed during this consultation on sustainable development for the Gaspé:

- Looking ahead 25 years, how would you describe the “perfect” Gaspé?
- How can we assure this vision at the local level?
- What challenges and obstacles are standing in the way of this vision?
- What are the strengths we can depend on and the weakness we must remedy to ensure sustainable development?
- What tools and methods should we develop to implement sustainable development in the region?
- Can you identify practices, projects or existing structures in your organization or community that already respond to sustainable development principles?

# Sustainable Development Consultation Gaspésie-Magdalen Islands

## Workshop Schedule

The workshop will last for two hours. In small groups of 10, participants will discuss and exchange ideas, and respond to questions concerning sustainable development in our region.

A facilitator and a note-taker will be part of each group to lead the discussion and to record ideas.
